**ADHESIVE TAPES**  
& PACKAGING MATERIAL

## **EXTREME SOLUTIONS: YOUR PARTNER IN PACKAGING EXCELLENCE**

Welcome to Extreme Solutions, your one-stop destination for high-quality packaging material and adhesive tapes. Established in 2018, we have quickly become a trusted name in the industry, known for our commitment to quality and customer satisfaction.

At Extreme Solutions, we specialize in manufacturing, supplying, exporting, and wholesaling a wide range of packaging materials to meet your diverse needs. Whether you are looking for BOPP self-adhesive tapes or other packaging solutions, we have you covered.

Our mission is to provide innovative and reliable packaging solutions that meet the highest standards of quality and sustainability. With our extensive experience and dedication to excellence, we strive to exceed your expectations and become your preferred partner in packaging.

## BOPP PACKAGING TAPES

Bopp Tape is made from BOPP (biaxial oriented polypropylene) film coated with acrylic adhesive. It brings a comprehensive range of standard packaging solutions for almost all bundling and sealing requirements. Our adhesive tapes are made from superior quality which provides high Tech and adhesion strength required for sealing of cartons to make them pilfer proof. The BOPP tape is available in various thickness options.

High resistance Tensile strength Good adhesion Resistant to aging and low temperature. Low costs durable, economical for general packing and carton sealing.

## BOPP TAPES (COLOR)

BOPP is Biaxially Oriented Polypropylene (BOPP) Film coated with water based adhesive and our adhesive tapes are made from superior quality adhesive, which provides high tack and adhesion strength required for sealing of cartons to make them pilfer proof.

- Ideal for carton sealing
- Tapes can be printed with company name or logo for better appeal & identification
- Bundling
- Re-inforcing
- Laminating
- Tabbing
- Label Protection

## BOPP TAPE (PRINTED)

BOPP is Biaxially Oriented Polypropylene (BOPP) Film coated with water based adhesive and our adhesive tapes are made from superior quality adhesive, which provides high tack and adhesion strength required for sealing of cartons to make them pilfer proof.

- Ideal for carton sealing
- Tapes can be printed with company name or logo for better appeal & identification
- Bundling
- Re-inforcing
- Laminating
- Tabbing
- Label Protection

## MASKING TAPE

Masking tape, also known as painter's tape, is a type of pressure-sensitive tape made of a thin and easy-to-tear paper, and an easily released pressure-sensitive adhesive. It is known for its ability to provide clean, crisp lines while protecting surfaces during furniture making, painting, construction, and various other applications.

## TISSUE TAPE (HOTMELT / SOLVENT)

It is a special double sided tissue tape which consists of non-woven tissue and is coated with high-grade strong adhesive on both sides. It bonds firmly onto leathers, clothes, woods, plastics, any two similar to dissimilar materials. The coated tissue tape uses include mounting light objects, and laminating textiles, cork, paper, and textiles.

## FOAM TAPE

A double sided tape has pressure-sensitive adhesive exposed on both sides, allowing two parts to be bonded together by the tape between them.

Foam tape can be used as mounting tape for interiors or fixing and bonding automotive badges and trims.

### Application

- Foam tapes are used for sound dampening
- Insulating, gasketing, cushioning/padding and sealing
- Design to enhance the appearance
- Improve the overall performance of your product design
- High performance double sided adhesive coated tapes for bonding over irregular surface
- Used for noise reduction and vibration controlling in the industries

## FLOOR MARKING TAPE

Floor marking tape is used for area demarcation. This floor marking tape is made of PVC and has a high resistance to solvents, oil and water. It has carrier material which is coated with natural rubber adhesive with premium-grade and durable properties. It is designed for marking and distinguishing ground and region, identification of hazardous regions such as construction sites and commonly used as a safety warning.

### APPLICATIONS

Used for Safety Identification and Lane Marking for storage segmentation. To mark hurdles like wiring lines, man hole or other safety areas in exhibition. Great for office and industrial use

### FEATURES:

- Good Resistance to chemical & other moving objects.
- Available in various sizes & colors
- Bright Color
- Rubber Adhesive Tape
- Immediate quick stick.
- High Strength
- Residue-Free Tape

## TEFLON TAPE

Thread Seal Tape / Plumber Tape/ PTFE (Polytetrafluoroethylene)

Commonly used in plumbing for sealing pipe threads. AVR Teflon Tape will help prevent the threads from seizing when being unscrewed and also works as a deformable filler and thread lubricant, helping to seal the joint without hardening or making it more difficult to tighten.

### Application

- Used to fix the joints in hardware products
- Plumbing for sealing pipes
- Fix the taps

## PVC INSULATION TAPE

PVC insulation tape is made from finest-quality PVC film coated with a sturdy rubber based adhesive on the side. It is highly elongated and has excellent conformability for wire harnessing. This adhesive PVC insulation tape suitable for electrical works comes with good insulation, voltage resistance, flame resistance, and waterproof. Available in broad selection of PVC insulation tape colours, spanning from red, green, Blue, white to black.

## RETRO REFLECTIVE TAPE

Retro reflective sheeting is flexible retro reflective material primarily used to increase the night time conspicuity of traffic signs, high-visibility clothing, and other items so they are safety and effectively visible in the light of an approaching driver's headlamps.

### APPLICATIONS

- Walking Passages
- Low Hanging Dangers
- Warehouse Machinery
- Water Activities
- Edges & Ledges
- Bicycles & Motorcycles
- Arts & Crafts
- Farm Use
- Adventure Travel

## DUCT TAPE

Waterproof PE Coated Fabric transparent duct tape which is backed by high adhesion (rubber adhesive) and very high tack property with hand tearable to feature. We offer multi-purpose, no- residue tape with heavy-duty, fabric reinforced adhesive ensures long-lasting hold. The tape is water-resistant, and ideal for applying on a jet engine, electrical appliances, drying vent, fixing all kinds of glass damages, and other binding and repairing uses. Our duct tapes are available in white, yellow, silver, and black options.

### APPLICATIONS

Most commonly used for such applications due to its high holding power across temperature ranges. It is good for heavy duty application. Used in construction industry for AC ducting.

### FEATURES:

- High strength
- Very high bonding adhesive.
- Hand tear able
- Water Proof

## BOOK BINDING TAPES

Also known as book repair tape, book binding tape is the collective name for several types of one sided tape used in various types of binding projects. It may be used to bind paper documents together or to repair hard back books where the cover has separated from the spine.

### APPLICATIONS

- Apply at the time of purchase to avoid torn book condition
- Binds and protects your new books
- Helps create your own books
- Provides a facelift for your old books
- Helps recycle your old books

## SURFACE PROTECTION FILM

Surface Protection Films designed to prevent the surface from scratches, marks during handling, transit, and after installation etc. These surface protection tapes give excellent scratch resistance and masking properties. These films are coated with non-transfer type speciality adhesive, to withstand abrasions and scratches on smooth and sensitive surfaces. When the protective film is removed, the quality of the substrate is revealed just as it was when manufactured.

### APPLICATION

The major industries in which it is preferred are Automotive, Label and Construction Industries. Other various common places of application are Color Coated Steel Sheets, Decorative Laminates, Anodized/Powder Coated Aluminum Sections, Marble / Granite, Aluminum Sheets, UPVC Profiles, Stainless Steel Sheets and Wooden Flooring etc.

### FEATURES:

- Easily Removable No Residue Tape
- High speed lamination
- Uniform & stable
- Printable

## CLOTH/ PLASTER TAPE

Cloth tape is an adhesive tape made with a cloth backing to make it durable and flexible. Whether you are taping down cables, fixing a loose item in place, or need a temporary seal on some pipework, cloth tape can be used. The resilience and flexibility of the tape also means it is useful for edge protection and is commonly used in the automotive industry.

## FILAMENT TAPE

Filament tape or strapping tape is a pressure-sensitive tape used for several packaging functions such as closing corrugated fire bond boxes, reinforcing packages, bundling items, pallet unitizing, etc. It consists of a pressure-sensitive adhesive coated onto a backing material which is usually a polypropylene or polyester film and fiberglass filaments embedded to add high tensile strength. There are

### APPLICATIONS

For packing of heavyweight cartons  
For Palletizing  
For strapping  
For sealing of metal coils or pipe bundling

### FEATURES:

- Strong holding power
- Have glass fibres
- Rubber adhesive

## ALUMINIUM FOIL TAPES

Aluminium foil tapes are adhesive tapes that have a foil-backing. Common applications include covering seams on ducts, joints and metal. Other industries that rely heavily on foil tapes include metal finishing, automotive, aerospace, and appliances. Aluminum tape is so durable that it is safe to use on machinery.

## STRAPPING ROLLS

Strapping rolls is a versatile product used to secure items like cardboard boxes and baled material for transport in many industries. Strapping rolls play an integral part in the packaging industry they are used to basically strap or bundle together boxes of cartoons during transmit for a smooth shipping process of your product without any damage.

## STRETCH FILM ROLL

Stretch film rolls are a versatile and essential packaging solution for a wide range of industries. These film rules also known as a stretch wrap or stretch wrap film, are highly elastic and clingy plastic film used to secure and protect products during transportation and storage.

## SHRINK FILM

Shrink Film (also referred to as shrink wrap) is a versatile polymer material used for the packaging of finished goods. Heat is applied to the film – by either a conveyor heat tunnel or an electric or gas heat gun – which catalyzes the film to shrink tightly around the item placed within.

## AIR BUBBLE ROLL

Bubble rolls are wraps used for Packaging of fragile items that has chance of breaking during shipping the air bubbles work as a cushion offers shock insulation and protect the product inside from damage based upon various requirements and nature of product we offers a wild range of bubble wrap rolls.

## COURIER BAG

A Courier bag is used to ship goods or documents from one place to another. Usually, it is made with LDPE/ HDPE material which is very soft, light-weighted, water-resistant, and tamper-proof. Usually, it is white from the outside and black from the inside.

Some industrial applications which commonly use tamper proof poly courier bags for shipping & mailing of various importing products.

- Online Shopping Companies (E-commerce Industry).
- Courier & Logistics Companies.
- Confidential Documents, Bank Related Documents & Mailing Invoices.
- Examination papers (Education Industry).
- Sending Brochures, Samples and Expensive Articles.
- Transmit Valuables Products.

### FEATURES:

- Made From 50 Micron LDPE films
- Transparent POD jacket on the back side of the bag
- Adhesive flap closure
- Peel & Seal adhesive line
- Water/moisture Resistant
- Durable
- High Seam Strength
- Easy to write on with a permanent marker
- Recyclable & Easy to Use
- Available in wide range of sizes
- Not opened easily

## ZIP LOCK BAG

Zip lock bag is a sealable plastic bag with a two-part strip along the opening that can be pressed together and readily reopened.

### FEATURES:

- Recyclable
- Lightweight
- Optimum tearing strength

## POLY BAG

(BOPP / LD / PP / HM)

Poly bags are some of the most popular uses of poly sheeting. Polyethlen bags can be developed at different densities to give the bags unique properties, strengths, and uses.

- Mainly used in packaging of clothes and stationary items
- Often used to contain bulk items like construction material such as cement and sand.
- Food safe for items like bulk dry goods such as rice or other grains
- For packaging irregularly shaped products, especially those with pointed or sharp edges.
- Bags are great for lightweight items requiring good visibility.
- Ease of access like small parts, food items, and pallet covers.
- Used for temporary storage, i.e. grocery bags and shopping totes.

## KRAFT PAPER TAPE

Kraft paper tape is a self-adhesive tape made out of flat back repulpable Kraft paper strips with a strong adhesive coating at the back. They are designed to resist tearing through transition and transportation. However, despite their strength, they are easily hand-tearable before application and are easy to use. The color of kraft paper tape is brown, owing to the natural color of kraft paper, hence also being known as brown kraft paper tape.

However, customized color printing and branding can be easily done on demand. They are widely used in packaging & binding applications. Since kraft paper is a paper-based tape, they are eco-friendly tape due to being biodegradable and bio compostable making them the ideal choice for sustainable packaging.

## BAG SEALING TAPE

BAG SEALING TAPE & PERMANENT TAPE is used to seal HDPE bags, courier bag and PVC bags. Its made of HDPE film , water glue and acrylic glue.
